MYA LINE - TECHNICAL DATASHEET

CREMA MANI DERMOPROTETTIVA MYA EFFETTO BARRIERA

DERMOPROTECTIVE HAND CREAM MYA with *barrier effect* is formulated with nourishing, moisturizing and emollient ingredients from biological agriculture. Its moisturizing and protective formulation is ideal for dry and sensitive skin, ideal even in the case of rough and reddened hands.

The application of DERMOPROTECTIVE HAND CREAM MYA with *barrier effect* creates an invisible protection, restoring the natural hydrolipidic balance of the skin and maintaining the normal transpiration of the skin and its pH.

DERMOPROTECTIVE HAND CREAM MYA with *barrier effect* is also an excellent daily nourishing treatment: it protects the skin from external environmental agents (temperature changes, wind, cold, dust, etc.), from irritations and dryness caused by contact with water (also of the sea or the pool); leaves the skin soft and elastic after each use; it helps to prevent irritations, redness, roughness, cracking and itching.

The light texture of DERMOPROTECTIVE HAND CREAM MYA with *barrier effect* does not leave residue and is not greasy, allowing it to be applied at any time: before work, at home, in the office and any time it is needed.

INSTRUCTIONS FOR USE

Apply the product on the areas to be protected. Massage until completely absorbed. Dries quickly. Repeat as necessary.
